

A full range of rolling stock engineering solutions, right in Derby.

Who we are. LORAM UK Ltd. based in Derby, at the heart of British Rail Industry. With a highly-skilled workforce and some of the best equipped workshops in the country, LORAM UK offers a complete range of maintenance, engineering and overhaul solutions to passenger, freight and on-track machine fleets.

Our parent company, LORAM Maintenance of Way, Inc., is a global leader in providing rail grinding and on track plant services. With our team of highly-competent engineering and project management specialists, we carry out a wide range of maintenance and overhaul activities on all type of rolling stock, for both passenger and freight markets.

LORAM UK's operating license allows us to support our clients with train movements on the main line, reducing costs and improving efficiencies on their project.

Why Choose LORAM UK. We pride ourselves on being customer-focused. We work in collaboration with our clients to understand their needs, accomplish their requirements with cost-effective engineering solutions, and deliver on-time and on-budget with the highest quality.
