GREX makes \$10,000 available for employees to donate to veteran charities

Georgetown, Texas (November 7, 2018) – Georgetown Rail Equipment Company (GREX) made \$10,000 available to its employees who are Armed Forces veterans to donate to veteran charities of their choice. Historically, GREX has supported its veterans through a variety of ways, but this year the company wanted to empower the veterans themselves to decide which causes to support.

“We regularly support veteran causes and programs, but we thought we could take it one step further this year and give the veterans in our GREX family the opportunity to choose where to donate,” said Greg Grissom, GREX president. “We can never thank them enough for their service, but we hope this gesture lets them know how grateful we are for it.”

Armed Forces veterans make up 12% of the combined GREX and SENSR workforce (a sister company under parent, Loram). Their roles span multiple departments, from specialized equipment operators working in the field to engineering team members in the office. GREX is proud to employ these brave men and women.

Charities that will receive donations include:

- [DV Farm](#)
- [Fisher House Foundation](#)
- [Gary Sinise Foundation](#)
- [Homes for our Troops](#)
- [Hope for the Warriors](#)
- [Navy SEALS Fund – Brotherhood Beyond Battlefield](#)
- [Operation Homefront](#)
- [Semper Fi Fund](#)
- [Soldier’s Angels](#)
- [Veteran Families United](#)
- [Wounded Warrior Project](#)

About Georgetown Rail Equipment Company

Since 1993, Georgetown Rail Equipment Company (GREX) has been putting technology to use to develop solutions that solve some of the oldest problems in the railroad industry. The privately held company is based out of Georgetown, Texas, and works in collaboration with customers across the globe to deliver custom solutions designed around their specific needs. GREX pinpoints where ballast is needed and automates its delivery, locates track flaws to keep operations running smoothly, helps railroads monitor bridges remotely, and much more. From the pioneering DumpTrain® ballast delivery system to the new Aurora X^{IV}™ track inspection system, GREX

products stand out among the rest as more technologically advanced, safer and more efficient. GREX is proud to be a Loram Maintenance of Way company.
